

# Surface colors

Beside the 9 clay body colors, Atelier Vierkant offers engobe top colors which can be applied on the outside of the natural clay.

Engobe, a liquid clay slip applied on the outside of the ceramic body, is mixed with oxides and fired upon the surface of the pot. The engobes are used as accents that embellish the shapes and volumes. They often cover partly the model, from time to time entirely, but in most cases their favour mixes with the body of the clay on which they are applied. Engobe applications are done on demand and patterns are customized to order.

Clay colors and textures can be mixed together, resulting in the widest display of possible choices and combinations and matching each client's expectations in the most personal and unique way.
